

# DuPont™ Voltatex® 1120

## C5 - waterborne Core Sheet Varnish

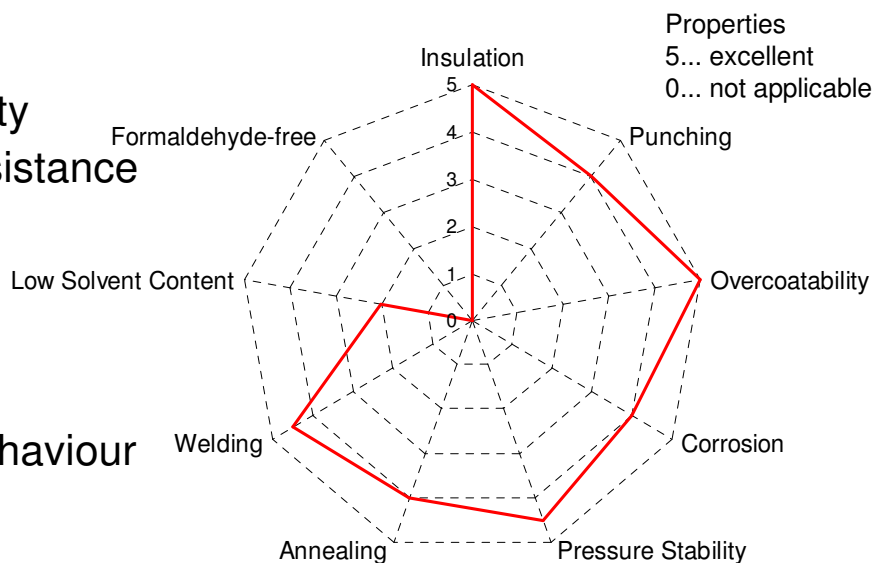

Chemical base: titanates and water diluable alkyd resins

### Application:

For fully finished and semi-finished electrical sheets e.g. coils, plates and punched parts. Mainly used for the manufacture of rotating machines and static machines of all sizes, especially when the material is exposed to high thermal stress.

### Advantages:

- ✓ Excellent weldability
- ✓ High annealing resistance
- ✓ Free of chromium
- ✓ Titanate system
- ✓ 1K – System
- ✓ Low abrasion
- ✓ Good punching behaviour
